

Edge 5000 and MegaLocker

Automatically track, manage and control PPE, MRO, tools and other industrial supplies in real-time.

Control and Manage your PPE and MRO with the Edge 5000, tailored to your requirements

- ▶ Configured individually to meet your needs based upon the exact product mix required
- ▶ Very adaptable with multiple dispense aids to accommodate products of nearly every shape and size
- Every item is test vended prior to configuration to ensure that the product consistently vends successfully
- Accurate current and historical Health and Safety records for use of PPE
- ▶ Verified vend technology confirms every vend to ensure stock accuracy
- Retain control over what has been taken, when things were taken and how many were taken
- ▶ Provides complete accountability for usage 100% audit trail

Protect your assets 24/7 with the MegaLocker

Valuable assets are often a challenge for organisations to manage and control. Using the Apex MegaLocker enables you to track and control assets and gives you 24/7 visibility of what assets have been taken, who took them and when.

- Automated alerts for when items have not been returned
- Rechargeable items can be locked down for a specified recharge period
- Recalibration dates for specialist tools, and measuring equipment, can be managed

 Gives complete accountability for critical or valuable assets

- Misuse of assets is monitored and controlled
- Automated alerts for damaged items

Apex makes it easy:

- Easy to use
- Easy to implement
- Easy to afford
- Secure
- Long term traceability of PPE usage by individual and product
- Lean application
- ▶ 24/7 accessibility at point of use Just plug into a power outlet, connect to the internet and it's up and running.

Simple, Easy, Straightforward

Accurate, real-time usage, inventory and restocking information is available anytime, anywhere from your browser or mobile device.

Eliminate stock outs • Reduce waste • Reduce costs • Improve inventory turns, lower inventory quantities • Control usage and quantities used • Provide documentation of compliance and proper supply usage • Automate supply distribution • Permit key personnel to concentrate on their jobs, not supply management

CASWELLSGROUP Workplace Supplies

Edge 5000 and Mega Locker

Automatically track, manage and control PPE, MRO, tools and other industrial supplies in real-time.

Technical Information

The Edge 5000 and MegaLocker is specifically built to withstand the harsh realities of industrial and remote environments.

Specifications	Edge	5000	MegaLockers
Maximum Number (single helices)	60	N/A	
Maximum Items	Capacity	Up to 2500	Up to 36 compartments
Height	183cm	199cm	
Width	104cm	102.5cm
