MegaStore

Automatically track, manage and control PPE, MRO, tools and other industrial supplies in real-time.

Apex MegaStore Series gives you better performance and greater versatility than any other system controlling the supply of critical parts and materials such as MRO and PPE items

We made the Safety Supply Cabinet smart

Apex MegaStore's sensor system works in conjunction with Trajectory, our Enterprise Technology Platform which manages all aspects of the machine functionality in real-time, to keep track of the inventory and consumption by user, cost centre, job number, etc.

Unlike most existing automated supply dispensing cabinets, MegaStore does not depend on "free issue" of supplies; neither does it require employees to tell it what they took. A network of sensors, working together with Trajectory, automates data collection and ensures that counts are always accurate and up to date. There's no bar code scanning and items do not need to be fitted with RFID tags.

MegaStore can automatically prepare restock orders and send them to you for approval or send them directly to your supplier, via email or into an ERP system.
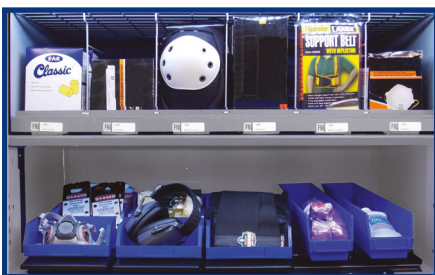

Apex makes it easy:

▪ Easy to use ▪ Easy to implement ▪ Easy to afford ▪ Secure ▪ Long term traceability of PPE usage by individual and product ▪ Lean application ▪ 24/7 accessibility at point of use

Simple, Easy, Straightforward

Just plug into a power outlet, connect to the internet and it's up and running.

Accurate, real-time usage, inventory and restocking information is available anytime, anywhere from your browser or mobile device.

Ideal for high-volume areas, 24/7 operations and remote locations

Eliminate stock outs ▪ Reduce waste ▪ Reduce costs ▪ Improve inventory turns, lower inventory quantities ▪ Control usage and quantities used ▪ Provide documentation of compliance and proper supply usage ▪ Automate supply distribution ▪ Permit key personnel to concentrate on their jobs, not supply management

MegaStore

Automatically track, manage and control PPE, MRO, tools and other industrial supplies in real-time.

Technical Information

The MegaStore is specifically built to withstand the harsh realities of industrial and remote environments.

Specifications	MegaStore Twin Door	MegaStore Combi
Height	199.5cm	199.5cm
Width	102.5cm	102.5cm
Depth	81cm	81cm
Weight	181kg	272kg
Electrical Services	230v	230v

Standard Configuration of MegaStore Machines

- ▶ **Twin Door**   6 shelves, choice of 6 modules*
- ▶ **Combi**   3 shelves, choice of 6 modules*
  5 drawes of standard configuration

Module Options

Module	Minimum Weight	Maximum Weight
22 pusher	N/A	N/A
12 pusher	N/A	N/A
9 pusher	N/A	N/A
6 pusher	N/A	N/A
11 load cell (2 x large cell)	200g	18.5kg
11 load cell (9 x small cell)	36g	2.2kg
6 load cell (6 x large cell)	200g	18.5kg

Draw Configuration

Drawer Number	Compartments	Minimum Weight	Maximum Weight
1	32	6g	410g
2	24	36g	2.7kg
3	12	100g	9.1kg
4	12	100g	9.1kg
5	4	200g	18kg

Other draw configurations are available.

*One shelf must contain a load cell module
