Solo

Automatically track, manage and control PPE, MRO, tools and other industrial supplies in real-time.

### Ideal for Manufacturing Cells, Machine Shops and Small Work Areas

- Breakthrough Technology, Breakthrough Pricing.
- Compact, agile, powerful
- No packaging required
- Versatile dispensing capabilities. Safely dispenses indexable inserts, packages of inserts or round tools
- Large capacity
- Real-time reporting anywhere, anytime from your browser-on-demand or prescheduled
- Automated re-ordering
- Alerts and alarms
- Access control and limits
- Large visual display panel standard - can display still images, presentations and video content

Apex makes it easy:

▪ Easy to use ▪ Easy to implement ▪ Easy to afford ▪ Secure ▪ Long term traceability of PPE usage by individual and product ▪ Lean application ▪ 24/7 accessibility at point of use

Simple, Easy, Straightforward

Just plug into a power outlet, connect to the internet and it's up and running.
Accurate, real-time usage, inventory and restocking information is available anytime, anywhere from your browser or mobile device.

Ideal for high-volume areas, 24/7 operations and remote locations

Eliminate stock outs ▪ Reduce waste ▪ Reduce costs ▪ Improve inventory turns, lower inventory quantities ▪ Control usage and quantities used ▪ Provide documentation of compliance and proper supply usage ▪ Automate supply distribution ▪ Permit key personnel to concentrate on their jobs, not supply management

CASWELLSGROUP
Workplace Supplies

Automatically track, manage and control PPE, MRO, tools and other industrial supplies in real-time.

Technical Information

Insert Capacity:
▸ 24 SKUs x a quantity of 20 per SKU = 480
▸ Round Tool Capacity (supports tools up to 19mm diameter and 152mm length):
▸ 16 SKUs x a quantity of 10 per SKU = 160
▸ 40 individual combined SKUs with 640 inventory positions
▸ Machine dimensions: 838mm wide x 698mm deep x 977mm high
▸ Pedestal, bench or wall mount (Pedestal to be purchased separately).

Round Tool Stack
Minimum size tool dispense – 4.76mm diameter x 38mm long
Maximum size tool dispense – 19mm diameter x 152mm long

Note: Bulk pack inserts can be dispensed from round tool stacks up to 12.7 thick by 38mm wide and 140mm in length.

For optimum dispense results, it is recommended that tools be placed in the shelves with the cutting end toward the door (front) of the machine. Tools that are smaller than the minimum specified diameter should be packaged in a protective container.

Insert stack
Minimum size insert dispense – 12.5mm (W) x 12.5mm x 7.2mm (H)
Maximum size insert dispense – 12.3mm (W) x 38mm x 9.2mm (H)

Note: To dispense properly, any two dimensions must be equal to or greater than 7.2mm

For optimum dispense results, it is recommended that inserts be placed on the shelves with the largest surface area lying flat on the shelf. Inserts that are smaller than the minimum specified size should be packaged in a protective container.
